# Company Overview

We deliver the mission critical IT services that move the world.

Freshbox Technologies is a system integrator specialising in advanced ICT solutions that positively influence business and society. We facilitate operations and create added value for our clients, driven by the desire to jointly build a connected and digital future. We are aware that our greatest capital is our staff, and we know that it is important that our employees remain motivated and have the opportunity for intellectual growth and advancement. We are building a connected and digital future for us all and for the generations to come. New technologies, expertise and a personalised approach to every client enable us to develop solutions that meet our clients' need in fields such as transport, energy, education, telecommunications, finance and security.

Based on new technologies, the cloud and mobile first principle, we create innovative enterprise solutions. We develop and implement solutions such as ERP, MS and employee efficiency management products such as HRplus. We build data centres, optimise IT infrastructure, introduce security solutions and develop new ways to manage information. This had led to the creation of products such as the BI business reporting system and GIS solutions for the exchange of spatial information.

Our partners and vendors are the world's leading ICT companies. In cooperation with them, we create the most suitable solutions for every customer and perform even the most complex operations following the dynamic trends in ICT.

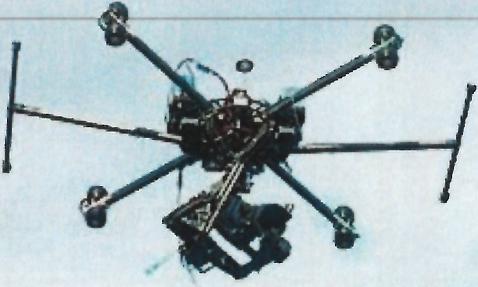

## Our Commitment

Freshbox Technologies is committed to being the ICT Industry's, most trusted and relied upon partner, providing best-in-class products, exceptional expertise and a passion for quality and customer satisfaction

## Our Core Values

Doing business ethically, legally and with integrity are the foundation of our company's culture. We also Believe in :

- Integrity
- Accountability
- Transparency
- Reliability
- Innovation

## SOFTWARE AND HARDWARE SERVICES

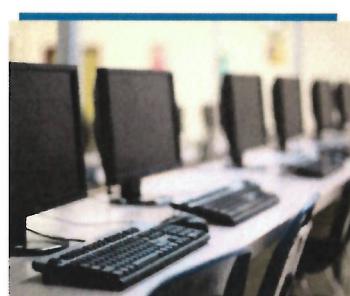

Freshbox Technologies Software and Hardware Services is the combination of expert, high-quality, end-to-end solutions for global clients and partners. Our team consists of specialists and engineers with a deep understanding of clients' needs in the areas of software development, connectivity, integration, quality assurance, interoperability, and cross-platform services. Our vast knowledge of modern technologies, supported by a combination of hardware and software, helps us to deliver a comprehensive, individual approach in each project. Through several years of cooperation with market leaders, we have gained experience much needed to equip your company with desired solutions. We guarantee an individual approach regarding the form of cooperation, and our role and visibility in the project. When it comes to IPR, we are flexible to the point that we can transfer it to the client after the project ends.

## CYBER SECURITY

## OUR COMMITMENT

A true partnership is a two-way street — ideas and information flow openly and regularly, based on a foundation of mutual trust and respect for one another's expertise — and our clients embrace this philosophy. We believe in not just providing a service to our clients but also forming a relationship based on understanding our client's needs and then developing solutions based on those needs.

We have worked with manufacturers, financial institutions, biotech and pharmaceutical companies, real estate developers and managers, technology companies, non-profits, and many other types of companies. Keeping close communication with our clients ensures that we continue to monitor and address any situations that might arise, strengthening the relationship and the success of all our clients across every industry.
